Four Plex Completed Project

PROJECT DESCRIPTION

FPBH, Inc. designed and managed four separate project contracts, to implement a major rehabilitation at the City Park and establish a sports complex atmosphere that connected other park features through a central walkway.

Prior to this project, the area enclosed four fields of varying dimensions that all backed up to one another, and contained severe drainage, safety, and access problems.

It took innovative design and geometrics, to provide four new fields that meet Little League specifications, and satisfy requirements for player and spectator safety and true accessibility. Working under extreme budget constraints, FPBH planned, budgeted and managed a Site Demolition and Preparation contract, a fencing contract an electrical and lighting contract, and a final paving and site improvement contract.
