Zoning GIS Attributes of a Parcel

Zoning Map From ThinkGIS

PROJECT DESCRIPTION

FPBH, Inc. provided GIS data creation for a zoning layer used in ThinkGIS. This zoning layer was for the entire county and was created from paper maps. These paper maps and notes were input into the GIS by individual parcel. All obtained notes of zoning history were recorded and attached to each parcel.

This zoning layer was set up to be user friendly and reduce time to record a zoning change. If a user wants to change zoning on a parcel they simply have to click on the parcel, pick the new zoning category from the drop down box, and input any zoning history related to the property.
