Zoning Map in ThinkGIS

Presentation Style Zoning Map

PROJECT DESCRIPTION

FPBH, Inc. provided GIS data creation for a zoning layer used in ThinkGIS. This zoning layer covered the majority of the county and was created from paper maps. These paper maps and notes were input into the GIS by individual parcel. All obtained notes of zoning history were recorded and attached to each parcel.

This zoning layer was set up to be user friendly and reduce time to record a zoning change. If a user wants to change zoning on a parcel they simply have to click on the parcel, pick the new zoning category from the drop down box, and input any zoning history related to the property.

Also provided were presentation zoning maps, including two 5 ft. tall wall maps with a dry-erase surface to mark zoning changes. Also provided, were color as well as black and white handout maps.
